

8. An imaging element comprising:
a pixel region including:
a first pixel and a second pixel each including a
photoelectric conversion element, a lens, and an
inner lens provided between the lens and the photo- 5
electric conversion element, and
a light-shielding film,
wherein a first part of the light-shielding film is embedded
in a trench provided between the first pixel and the
second pixel, and 10
wherein a second part of the light-shielding film is pro-
vided on part of a light-receiving surface of a light-
receiving section of the second pixel.
9. An imaging device provided with the imaging element
according to claim 8. 15
